

SOC122

Introduction to the Social Sciences

Reading across ways of knowing

A short, friendly map to your course companion site, what it is, where everything lives, and how to make it work for you.

YOUR COURSE SITE

SOC122 Companion Website

This instructor-created companion website supports weekly learning in SOC122. Open it from Blackboard or use <https://rpeart73.github.io/soc122/>.

START HERE

Your companion site, not another inbox

This instructor-created companion website supports weekly learning in SOC122. It gathers weekly learning pathways, assigned readings, key concepts, experiences, and study supports in one place. Blackboard remains the official Seneca course platform for announcements, assignment submission, grades, discussions, course records, and required administrative functions.

What it is

- Your weekly learning pathway, in working order
- Every reading, concept, and self-check in one spot
- A companion that sits beside Blackboard

What it is not

- Not a replacement for Blackboard
- Not where announcements, submissions, discussions, grades, or course records live
- Not a place that collects student submissions or stores grades

How to use this page, on every page

At the top of every site page, open How to use this page for current written steps: what to click, temporary browser storage, grading boundaries, and where to go next. A short, silent, captioned tour appears only when it is current and available. Otherwise, the panel says Video tour coming soon. Return to the written steps whenever a page feels unfamiliar.

PRIVACY, ACCESSIBILITY, AND COPYRIGHT

Use it alongside Blackboard

This site does not require an account, collect student submissions, or store grades. Its own code does not transmit the optional first name, notes, check answers, or Assignment Start Lab responses. Browser storage may keep a temporary copy on this device, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can prevent or remove it. Download anything you need to keep. Opening an external link, loading external media, or sending the prefilled problem-report email contacts that provider.

Course readings and media are linked for educational use. Copyright remains with the original creators and publishers. Students should access readings through the provided links, Seneca library access, or Blackboard where applicable. Students who experience barriers using the site should use Blackboard and contact the instructor so access can be supported.

START HERE

Open How This Site Works first

It is the first item in the course menu because it explains what this companion site does, what still belongs in Blackboard, what may use temporary browser storage, and how to clear locally stored work on a shared device.

After that short orientation, open Home for the weekly journey. The instructional manuals stay in Site Support whenever you need more detail.

The menu is the map

How This Site Works comes first, before Home, so students meet the site boundaries, privacy controls, accessibility supports, and reset option before beginning the course journey. The rest of the menu is grouped by the work students are trying to do. Home and Calendar orient the term; Weekly Experiences and other immersive spaces hold the teaching environments; source tools support evidence work; assignment and career tools support application; and Site Support keeps the instructional manuals and Report a Problem control.

The sample cards below explain the most-used doors. The live menu is always the complete and current navigation.

SOC122 Companion, navigation	
How This Site Works Start here: purpose, Blackboard boundaries, privacy, accessibility, saved work, and reset controls	
Home The course journey, week by week	Readings and Media Every assigned source, as a card
Compare Sources Hold up to three readings side by side	Source Practice Turn any reading into practice questions
Glossary Every key term, with its source	Concept Flashcards Retrieval practice, no course marks
Weekly Experiences Every week's immersive teaching experience, in one hub	Cultural Lab and Course Synthesis Compare named contexts, then build a bounded synthesis

The course as a journey

Home lays the course out week by week. Each station shows the week's title and its **guiding question**, the one question worth carrying through everything you read that week.

- 1 Click any week station to open that week's page.
- 2 Coming back later? Browser storage may let the site offer to pick up where you left off on this device, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove that temporary record.

HOME · THE COURSE JOURNEY, EACH WEEK WITH ITS GUIDING QUESTION

See the course through your program

The two controls on Home do different work. **Your program** changes the concrete field world: concept and key-term examples, the weekly field inquiry, case study, activity purpose, questions, reflection, and the full Career Choices route. **Learning emphasis** changes the intellectual route through every week: Western social science foregrounds the discipline's institutions, methods, archives, and classifications; Two-Eyed Seeing keeps Indigenous and Western knowledge systems whole and in accountable relation; Indigenous scholarship enters through the week's named scholar, Nation, community, place, and source. The hero and spotlight images, full spotlight explanation, reading order, key concept work, key term work, activity framing, experience, and reflection question all change with that emphasis. If you choose a program, the spotlight also adds a program-specific example and evidence boundary.

- 1 On Home, open **Your program**. Pick your exact Seneca program, an area of study, or the general route. The course does not guess your identity from your program.
- 2 Choose a **Learning emphasis**. Move between all three routes whenever you want to test what each foregrounds, what evidence it asks you to notice, and what boundary it keeps visible.
- 3 Open a week and look for **Learning emphasis**, the changing **spotlight**, and **For your program**. These are substantive routes through the shared course material, not labels added to the same paragraph.
- 4 For the deeper write-up, open **Career Choices** from the menu. It gives you three clear sections: program context, how SOC122 connects to that field, and how to use the social lens with care.
- 5 Change either control as often as you need. Browser storage may keep a temporary copy of the choice on this device; browser settings, private browsing, clearing site data, shared-device use, or changing devices can reset it.

A lens, not a different course

Every student works from the same required readings, learning outcomes, assessments, deadlines, and grading standard. Personalization changes the examples, evidence route, questions, images, and reasoning work. It does not assign a culture to you, substitute an optional context for assigned evidence, or create an easier version of the course.

COMPARE, THEN TEST YOUR UNDERSTANDING

Cultural Lab and Reflection Wings

Cultural Comparison Lab

Open it from **Immersive Rooms**. Choose a week and up to three named contexts. The lab changes its questions with the week and gives each context its own object of study, evidence base, and warning against conflation. Race, religion, nationality, language, region, and culture are never treated as interchangeable. The lab helps you build a comparison; it does not write the conclusion. Use **Reset comparison** whenever you want to begin again.

Reflection Wings

There is no Reflection Wing button on Home or in the menu. After you have explored enough of the course, the site may invite you to take one. You can accept or return to the classroom. Later invitations use harder questions, and the form varies so the experience is not identical each time. The feedback report is personal, self-study practice worth no course marks. It is not submitted or graded; browser storage may keep a temporary copy, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove it. It uses rubric language to diagnose concepts, evidence, comparison, attribution, institutions, transfer, and synthesis, but it cannot grade the personal and original work required in a submitted assessment.

Anatomy of a week

Every week page runs in the order the week is meant to run. Work it top to bottom.

Study Guide. Before the Knowledge Check, each teaching week carries a rehearsal space: a quick warm-up from earlier weeks, explain-it-back cards where you put each key concept in your own words and compare with the reading, and a question ladder that works the week's guiding questions from recall to application. These notes are not submitted or graded and earn no course marks. Browser storage may keep a temporary copy, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove it.

Knowledge Check. Every week closes with an optional self-check that may show a practice result but carries no course marks. Set A and Set B are multiple choice, this week's ideas plus a short review from earlier weeks; Set C is different, with short scenarios, matching, and a written reflection you compare against a model. After you answer, you can say how sure you were, and the summary shows not just what you got right but where a confident answer was actually wrong, the thing most worth fixing. These answers are not submitted or graded. Browser storage may keep a temporary copy, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove it; clear or change any answer for a fresh set.

- 1 **This week's focus**, the question and learning sequence that organize the week.
- 2 **Overview & How this week works**, read this first; it tells you what to do and in what order.
- 3 **Purpose & Outcomes**, what you should be able to do by the end. Test yourself against these sentences.
- 4 **Guiding Questions**, carry at least one with you into the readings.
- 5 **Key Concepts**, each explained and cited to that week's reading, so you always know where an idea comes from.
- 6 **Readings**, full citation and a button. Open access, Seneca Library, Read on Blackboard, or Revisit from an earlier week.
- 7 **The Experience**, an interactive chapter sequence embedded on the page. Enter it, make choices, inspect the evidence, and use the Arrow keys to move between chapters.
- 8 **The Activity**, press Start and follow the prompts. Practice, not assessment.
- 9 **Reflect**, a short prompt (one or two sentences) to close the week.
- 10 **You can now**, the week's closing checklist. Tick what you can genuinely do; anything left unticked shows exactly what to revisit. Reset any time.

Assignment released (September 11): Personal Cartography

WEEKLY JOURNEY Week 1

- Introduction and

A WEEK PAGE · EVERYTHING IN WORKING ORDER, TOP TO BOTTOM

Every reading, as a card

The library holds every course reading: what it is, what it argues, how long it takes, and how to reach it.

- 1 Search any author, title, or idea.
- 2 Filter to one week with the week strip, or browse by format.
- 3 Click a card for the reading's page: core idea, plain-language abstract, level and length, and where the text lives.
- 4 Press the red button to open the reading. A Source page button appears where a separate source or DOI exists.
- 5 Bookmark a reading to your Saved shelf. Browser storage may keep a temporary copy, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove it; note anything you need to keep.

EVERY SOURCE AS A CARD, SEARCHABLE BY WEEK

A READING PAGE · CORE IDEA, ABSTRACT, AND THE OPEN BUTTON

COMPARE SOURCES

Hold up to three readings side by side

- 1 Open Compare from the menu, or press Compare on any reading page.
- 2 Pick up to three readings. Each becomes a column: week, year, origin, length, level, and core idea.
- 3 With two or more selected, press **Show a worked weaving**. The site models ONE way of holding the readings together, fully attributed, with both ways of knowing kept whole. It always ends by handing the weaving back to you, because your weaving is the one that counts.
- 4 With three, it takes the pairings one at a time, then asks what only appears when all three are on the table.
- 5 Remove a reading with the × on its column, or Clear all to start over.

THE SITE MODELS THE PRACTICE, THEN HANDS IT BACK TO YOU

Turn any reading into practice

Choose a reading, choose a lens, and answer. Every answer comes back with a short explanation grounded in the reading itself, so a wrong answer still teaches you something specific.

LENS 01

Thematic

What it is about.

LENS 02

Argument

What it claims, and why.

LENS 03

Context

Where it sits in the field and the course.

GLOSSARY

Never defined out of thin air

- Browse by week (including the closing weeks) or search any term.
- Every definition carries a citation to that week's assigned reading.
- The *Scholars this week* strip introduces the people behind the readings. Click a name to jump to their reading.

CONCEPT FLASHCARDS AND KNOWLEDGE CHECKS

Practice, no course marks

- Pick a week, or take all weeks together.
- Flip the cards: term on the front, definition and citation on the back.
- Run the short quizzes; each question explains its answer. The interface may show correctness or a practice result, but answers are not submitted or graded and earn no course marks. Browser storage may keep a temporary copy, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove it; use the practice to see what to reread.

Weekly Experiences hub. Every week's experience also lives in one place. Open it from the menu and choose a week to re-enter it without hunting.

Two-Eyed Seeing on the site

This course is framed by Etuaptmumk, Two-Eyed Seeing, Mi'kmaw Elder Albert Marshall's principle of seeing with the strengths of Indigenous ways of knowing in one eye and Western ways of knowing in the other, both kept whole. Every reading on the site is labelled with its perspective. Neither is ranked above the other, and the site never blends them into one voice.

Indigenous-scholar reading

Kept whole, in its own voice.

Western reading

Kept whole, in its own voice.

THE TWO ATTRIBUTED EYES STUDIO

See with both eyes

- 1 Each content week's studio sets the week's two source frames side by side, each attributed.
- 2 Work the prompts: what does each eye let you see that the other cannot?
- 3 Press **Save my work to the Personal Cartography** to download your responses as a Word document you can keep building on all term.

COURSE SYNTHESIS

Return to the globe

The Course Synthesis room uses a globe to bring your selected contexts, weekly questions, program route, and learning emphasis back into one evidence trail. It asks what can travel across contexts, what must remain specific, and what responsibility follows from the comparison.

The globe is a synthesis tool, not a claim that the world is one culture. Keep every source attached to its own people, place, purpose, method, and limits.

THREE MORE WAYS INTO THE LIBRARY

The alphabetical list.

ACCESSIBILITY AND STUDY SUPPORTS

Reading Lens and other study supports

The **Reading Lens** button at the top of every page opens reading supports that apply across the whole site: text size from 75 to 175 percent, comfortable spacing, a high-legibility font, nine page tints (including a blue light filter that warms the whole screen), a reading ruler that follows your pointer (choose its width, pin it in place,

and drag it by hand), a large-print magnifier docked at the bottom of the screen, and read-aloud in your choice of the voices on your own device; a Listen button also sits at the top of every page. Inside an experience, use the separate **A minus**, **A plus**, and **Reset** controls to set experience text from 100 to 200 percent. Dense chapters scroll vertically at readable size instead of shrinking their text. Browser storage may keep a temporary copy of these choices on this device; browser settings, private browsing, clearing site data, shared-device use, or changing devices can reset them. A Reset all supports button returns everything to default.

Your temporary browser work. Notes and check answers are not submitted or graded and earn no course marks; checks may show a practice result. Browser storage may keep a temporary copy on this device, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can prevent or remove it. To keep a separate copy, use **Generate Your Weekly Notes** at the end of any week. On a shared or lab computer, the How This Site Works page has a one-click **Clear my saved work** control.

Week pages start folded. Each week opens as a clean map of headings. Press the button beside any heading to open just that section, up to two sections stay open at once (opening a third folds the earliest), and you can fold any section back down when you finish it. Sections fold again when you leave the week, so every visit starts from the clean map, and jumping to a section from the side list opens it for you.

Your study compass. When browser storage is available, the home page may read activity temporarily kept on this device, including weeks opened, checks tried, and reflections written, and offer up to three next steps. It uses a few fixed rules, not AI, and the companion site's own code does not transmit those activity records. You can add your first name so the site greets you; browser storage may keep a temporary local copy, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can remove it. Clear my saved work removes it when present.

Reading Rescue. Inside each week's Readings section, Reading Rescue is the shortest honest path back in if you fall behind: one anchor reading, one concept to carry, and one evidence question. It is a way back into the readings, never a replacement for them.

If something breaks. Weekly Experiences now open inside the site with the menu still beside you, and every image and 3D model can be enlarged. If a video will not load or anything looks wrong, the How This Site Works page has a Report a problem button that emails the instructor with the page details filled in. If the site is ever unavailable, everything required for the course is also on Blackboard.

Privacy. No third-party content loads automatically. A third-party service is contacted only when you choose to open an external link or load external media. YouTube uses its privacy-enhanced player, and each external service applies its own privacy practices.

Make a small, realistic start plan

Use [the seven current assignment guides](#) for the complete tasks, marking criteria and submission steps. The release and due dates are listed below. Blackboard holds your submissions, feedback and grades.

What it creates. Fixed course rules combine your answers into a personal starting point, course-specific next actions, a success target for the next work session, useful questions, and the right human support routes. The plan also explains why each pathway was selected. No AI is used.

How your plan is handled. The companion site's own code does not upload, submit, score, grade, or send your name, context, answers, or plan to the instructor. Browser storage may keep a temporary copy on this device, but browser settings, private browsing, clearing site data, shared-device use, or changing devices can prevent or remove it. Print or save the plan as a PDF, or copy it as text.

SOC122 | CROSS-CULTURAL INTERFACES

Assignment start plan for Jordan

Personal Cartography sequence | Created July 13, 2025 | Planning support only
Program or field: Social Service Worker | Blackboard due date you recorded: October 8 at 11:59 p.m.

What you are working toward
Build the course map from weekly observations and notes instead of inventing it at the end.

Your starting idea or question: I want to use the Week 3 case but keep the claim narrow.

Your starting point

- Assignment: Personal Cartography sequence
- Program or field context: Social Service Worker
- Due date and time copied from Blackboard: October 8 at 11:59 p.m.
- Planned work session: Tuesday at 7 p.m. in the library
- What feels difficult: I do not know what sources or evidence to use. I am stuck on the first sentence or paragraph.
- Your exact description of the sticking point: I have a topic, but I cannot tell which source should anchor my first paragraph.
- What you marked ready: I have the official Blackboard brief open. I have relevant course notes or weekly work. I wrote down the exact due date and time.
- What you have already done or collected: I opened the brief, reviewed Week 3 notes, and saved one possible case.

A PERSONAL PLAN • READY TO PRINT OR SAVE AS PDF

Blackboard remains official. Always return there for the complete brief, rubric, due date, submission link, and recorded grade. The lab helps you begin; it does not write the assignment or replace the instructor's requirements.

GOOD HABITS FOR THE TERM

A rhythm that works

STEP 1

Open the week page early and read the overview.

STEP 2

Do the readings with one guiding question in hand.

STEP 3

Enter the experience and follow its chapters. Increase the text size if you need it and scroll within a dense chapter.

STEP 4

Do the activity.

STEP 5

Tick the You can now checklist honestly.

Before each assignment, use **Compare Sources** on the readings you plan to write about, then use the week's Concept Flashcards, Study Guide, and Knowledge Check to find the concepts or evidence limits that need another look.

Good to know

- Works on phones, tablets, and laptops, and is designed for keyboard navigation.
- Browser storage may keep a temporary copy of your saved shelf, notes, and check answers on this device; this companion-site work is not submitted or graded and earns no course marks, though checks may show a practice result.
- Browser settings, private browsing, clearing site data, shared-device use, or changing devices can prevent or remove that copy.
- If the site looks stale after an announced update, refresh the page once.

THE ONE RULE THAT MATTERS

When in doubt, Blackboard wins.

SOC122 companion website. Blackboard remains the official course platform for submissions, grades, announcements, discussions, and course records.

QUICK REFERENCE

Where to go for what

Start this week's work	Home ▶ click the week ▶ work top to bottom

See how readings connect	Compare Sources ▶ pick up to three
Test yourself on a reading	Source Practice ▶ pick a lens
Look up a term	Glossary ▶ search
Drill before an assessment	Concept Flashcards and Knowledge Checks ▶ pick the weeks
Re-enter the week's experience	Weekly Experiences ▶ pick the week
Submit anything / check grades	Blackboard, always

[Current assessment instructions, dates, submission steps, and grading criteria](#)

Assessment release and submission dates

All dates are in 2026 and use Eastern Time. Assessments open at 12:01 a.m.; submissions are due at 11:59 p.m. You can preview the public website, but Blackboard controls the assessment opening dates. Larger tasks have longer working windows. Instructions identify earlier feedback to use when one task builds on another.

SOC122 deadlines. All times are Eastern Time (ET).

Assignment	Opens	Posted deadline	48-hour window ends
1. Where I Stand: Social Location Map (20%)	September 18, 2026 12:01 a.m. ET	September 30, 2026 11:59 p.m. ET	October 2, 2026 11:59 p.m. ET
2. Two-Eyed Seeing Observation Journal: Set 1 (10%)	September 18, 2026 12:01 a.m. ET	October 14, 2026 11:59 p.m. ET	October 16, 2026 11:59 p.m. ET
3. Research Choices Lab (20%)	October 13, 2026 12:01 a.m. ET	October 20, 2026 11:59 p.m. ET	October 22, 2026 11:59 p.m. ET
4. One Issue, Different Perspectives (10%)	November 6, 2026 12:01 a.m. ET	November 18, 2026 11:59 p.m. ET	November 20, 2026 11:59 p.m. ET
5. Dystopian Conformity Lab: "Number 12 Looks Just Like You" (15%)	November 20, 2026 12:01 a.m. ET	December 2, 2026 11:59 p.m. ET	December 4, 2026 11:59 p.m. ET
6. Personal Cartography: Society and Me (15%)	December 1, 2026 12:01 a.m. ET	December 11, 2026 11:59 p.m. ET	No automatic window
7. Final Learning Reflection (10%)	December 7, 2026 12:01 a.m. ET	December 13, 2026 11:59 p.m. ET	No automatic window

The first three assessments total 50%; their standard submission windows close by October 22. This schedule allows ten calendar days for marking before the second half begins November 2. No assessment is due during Study Week, October 26 to 30. The final scheduled submission is December 13.

Assignment 4 is a discussion. Your initial post is due November 13, 2026 at 11:59 p.m. Eastern; its no-penalty window ends November 15, 2026 at 11:59 p.m. Eastern. Your reply is due November 18, 2026 at 11:59 p.m. Eastern; its window ends November 20, 2026 at 11:59 p.m. Eastern. The full guide includes a supplied sample if no suitable classmate post is ready.

Deadlines and Extensions

Posted deadlines

Submit through Blackboard by the posted deadline. All dates and times use Eastern Time. Saving a draft is not the same as submitting; check for Blackboard's submission confirmation.

Regular assignments: 48 hours without a penalty

Regular assignments have an automatic 48-hour submission window after the posted deadline, without a grade penalty. You do not need permission to use this window. Each assessment shows its posted deadline and the exact date and time the window ends. Blackboard may label a submission made during this window as late; that label does not mean a penalty applies.

Request an extension BEFORE the posted deadline

Routine extension requests must reach me before the original posted deadline. The 48-hour submission window does not extend the deadline for requesting an extension. Routine requests made during or after that window will not be approved. A request made before the deadline does not guarantee approval.

After the 48-hour window

Work submitted after the standard 48-hour window receives zero unless an extension or exception has been approved. Blackboard may still allow an upload so approved exceptions can be handled; an available submission box does not extend the acceptance deadline.

Unexpected emergencies and accommodations

If an unexpected emergency arises, or prevents you from contacting me earlier, contact me as soon as possible. Exceptional circumstances are considered individually. Approved accommodations remain in effect and determine your applicable arrangements. Contact me privately rather than posting personal information in the course-question forum.

Scheduled live assessments

Scheduled live assessments or presentation components do not have an automatic 48-hour window. Contact me before the scheduled time if you cannot attend, or as soon as possible if an emergency prevents advance contact. Any written or recorded alternative follows the submission instructions for that assessment.

Final projects and the Final Learning Reflection

Final projects are due December 11, 2026 at 11:59 p.m. Eastern. The Final Learning Reflection is due December 13, 2026 at 11:59 p.m. Eastern. These final assignments have no automatic 48-hour window. Routine extension requests must arrive before the posted deadline. Approved accommodations and exceptional circumstances are handled individually.

If Blackboard prevents submission

Contact me promptly and keep evidence of the problem, such as the error message and time. Email is for reporting the issue, not the normal assessment submission route. I will explain how to proceed if a technical problem requires another arrangement.

[Read the policy and exact course deadlines online.](#)
