

SOC122

Introduction to the Social Sciences

Reading across ways of knowing

A short, friendly map to your course companion site, what it is, where everything lives, and how to make it work for you.

YOUR COURSE SITE

SOC122 Companion Website

This instructor-created companion website supports weekly learning in SOC122. Open it from Blackboard or use the public address in this guide.

START HERE

Your companion site, not another inbox

This instructor-created companion website supports weekly learning in SOC122. It gathers weekly learning pathways, assigned readings, key concepts, walkthroughs, and study supports in one place. Blackboard remains the official Seneca course platform for announcements, assignment submission, grades, discussions, course records, and required administrative functions.

What it is

- Your weekly learning pathway, in working order
- Every reading, concept, and self-check in one spot
- A companion that sits beside Blackboard

What it is not

- Not a replacement for Blackboard
- Not where announcements, submissions, discussions, grades, or course records live
- Not a place that collects student submissions or stores grades

Use it alongside Blackboard

This site does not require an account, does not collect student submissions, does not store grades, and does not send personal student information to the instructor, Seneca, or any server. The optional first name, notes, and check answers stay in this browser unless you remove or export them. External media players may be subject to the privacy practices of the host platform.

Course readings and media are linked for educational use. Copyright remains with the original creators and publishers. Students should access readings through the provided links, Seneca library access, or Blackboard where applicable. Students who experience barriers using the site should use Blackboard and contact the instructor so access can be supported.

THE WHOLE SITE, AT A GLANCE

The menu is the map

The left-hand menu is the entire site. Here is every door and where it leads.

SOC122 Companion, navigation	
 Home The course journey, week by week	 Library of Readings Every assigned source, as a card
 Compare Reading Concepts Hold up to three readings side by side	 Build Your Reading Comprehension Turn any reading into practice questions
 Glossary & Thinkers Every key term, and the scholars behind it	 Self-check Flip cards & short quizzes, never scored
 Weekly Walkthroughs Every week's narrated deck, in one hub	 By week · Tiles · Index Three more ways into the same library

The course as a journey

Home lays the course out week by week. Each station shows the week's title and its **guiding question**, the one question worth carrying through everything you read that week.

- 1 Click any week station to open that week's page.
- 2 Coming back later? The site remembers where you were on this device and offers to pick up where you left off.

HOME · THE COURSE JOURNEY, EACH WEEK WITH ITS GUIDING QUESTION

See the course through your program

SOC122 reads the social world with two eyes, Indigenous and Western ways of knowing kept whole, and that way of seeing travels into every field. Right on Home you can reframe the whole course around your own program of study, so Two-Eyed Seeing shows up in the work your field will actually ask of you.

- 1 On Home, find the control that says **See this course through your program**. Pick your program from the dropdown of Seneca programs, grouped by area of study. You can also pick a whole area, or choose **Still exploring**.
- 2 You stay on Home. Nothing navigates away. A short **For your field** panel appears at the top, tying the whole course to your program.
- 3 Each week on the journey gains its own short **For your field** line, and the weeks that matter most to your field are marked **Key for your field**.
- 4 For the deeper write-up, open **Career Choices** from the menu. It gives you three clear sections: program context, how SOC122 connects to that field, and how to use the social lens with care.
- 5 A small chip at the top shows **Viewing as your program**, with a way to change it or turn it off during the current session.

A lens, not a different course

Every student reads the same readings and does the same assessments. The lens only changes how the course is framed for you, it never changes what is required. You can turn it off any time, and the chip at the top of the page is how you do it.

Anatomy of a week

Every week page runs in the order the week is meant to run. Work it top to bottom.

Study Guide. Before the Knowledge Check, each teaching week carries a rehearsal space: a quick warm-up from earlier weeks, explain-it-back cards where you put each key concept in your own words and compare with the reading, and a question ladder that works the week's guiding questions from recall to application. Nothing is recorded or graded; your notes stay in your own browser.

Knowledge Check. Every week closes with an optional, never scored self-check. Set A and Set B are multiple choice, this week's ideas plus a short review from earlier weeks; Set C is different, with short scenarios, matching, and a written reflection you compare against a model. After you answer, you can say how sure you were, and the summary shows not just what you got right but where a confident answer was actually wrong, the thing most worth fixing. Nothing is recorded; clear or change any answer and take another set fresh.

- 1 **Time budget**, under the title, roughly how the week's work divides up.
- 2 **Overview & How this week works**, read this first; it tells you what to do and in what order.
- 3 **Purpose & Outcomes**, what you should be able to do by the end. Test yourself against these sentences.
- 4 **Guiding Questions**, carry at least one with you into the readings.
- 5 **Key Concepts**, each explained and cited to that week's reading, so you always know where an idea comes from.
- 6 **Readings**, full citation and a button. Open access, Seneca Library, Read on Blackboard, or Revisit from an earlier week.
- 7 **The Walkthrough**, a slide deck embedded on the page. Arrow keys move through it, or open it fullscreen.
- 8 **The Activity**, press Start and follow the prompts. Practice, not assessment.
- 9 **Reflect**, a short prompt (one or two sentences) to close the week.
- 10 **You can now**, the week's closing checklist. Tick what you can genuinely do; anything left unticked shows exactly what to revisit. Reset any time.

Back to your journey

WEEK 3

Indigenous Canada

This week asks a plain question with a long history behind it: whose knowledge counts, and who gets to decide? You meet two scholars who answer it from different angles. Debbie Martin describes Two-Eyed Seeing as a respectful pairing of Indigenous and non-Indigenous knowledge, where the two are held together as partners and neither is ranked above the other or absorbed into the other. Brunette-Debassige and colleagues turn to the classroom and the institution, and show that what a school treats as legitimate knowledge is a decision that was made by people

A WEEK PAGE · EVERYTHING IN WORKING ORDER, TOP TO BOTTOM

Every reading, as a card

The library holds every course reading: what it is, what it argues, how long it takes, and how to reach it.

- 1 Search any author, title, or idea.
- 2 Filter to one week with the week strip, or browse by format.
- 3 Click a card for the reading's page: core idea, plain-language abstract, level and length, and where the text lives.
- 4 Press the red button to open the reading. A Source page button appears where a separate source or DOI exists.
- 5 Bookmark a reading to your Saved shelf. It stays on this device so you can return before an assessment.

EVERY SOURCE AS A CARD, SEARCHABLE BY WEEK

A READING PAGE · CORE IDEA, ABSTRACT, AND THE OPEN BUTTON

Hold up to three readings side by side

- 1 Open Compare from the menu, or press Compare on any reading page.
- 2 Pick up to three readings. Each becomes a column: week, year, origin, length, level, and core idea.
- 3 With two or more selected, press **Show a worked weaving**. The site models ONE way of holding the readings together, fully attributed, with both ways of knowing kept whole. It always ends by handing the weaving back to you, because your weaving is the one that counts.
- 4 With three, it takes the pairings one at a time, then asks what only appears when all three are on the table.
- 5 Remove a reading with the × on its column, or Clear all to start over.

THE SITE MODELS THE PRACTICE, THEN HANDS IT BACK TO YOU

BUILD YOUR READING COMPREHENSION

Turn any reading into practice

Choose a reading, choose a lens, and answer. Every answer comes back with a short explanation grounded in the reading itself, so a wrong answer still teaches you something specific.

LENS 01

Thematic

What it is about.

LENS 02

Argument

What it claims, and why.

LENS 03

Context

Where it sits in the field and the course.

Never defined out of thin air

- Browse by week (including the closing weeks) or search any term.
- Every definition carries a citation to that week's assigned reading.
- The *Scholars this week* strip introduces the people behind the readings. Click a name to jump to their reading.

Practice, never scored

- Pick a week, or take all weeks together.
- Flip the cards: term on the front, definition and citation on the back.
- Run the short quizzes; each question explains its answer. Nothing is recorded, it exists so you know what to reread before it matters.

Weekly Walkthroughs hub. Every week's deck also lives in one place. Open it from the menu and pick the week to rewatch without hunting.

ETUAPTUMUK

Two-Eyed Seeing on the site

This course is framed by Etuaptmuk, Two-Eyed Seeing, Mi'kmaw Elder Albert Marshall's principle of seeing with the strengths of Indigenous ways of knowing in one eye and Western ways of knowing in the other, both kept whole. Every reading on the site is labelled with its perspective. Neither is ranked above the other, and the site never blends them into one voice.

Indigenous-scholar reading

Kept whole, in its own voice.

Western reading

Kept whole, in its own voice.

See with both eyes

- 1 Each content week's studio sets the week's two source frames side by side, each attributed.
- 2 Work the prompts: what does each eye let you see that the other cannot?
- 3 Press **Save my work to the Personal Cartography** to download your responses as a Word document you can keep building on all term.

The map

SCHOLARS ANCHORED TO THEIR SELF-IDENTIFIED NATIONS

The map anchors the course's Indigenous scholars to their self-identified nations, each anchor linked to its reading. It is a teaching aid, not a legal or definitive boundary; for authoritative territories and treaties, consult the Nations themselves and sources such as Native-Land.ca. Everything on the map is also in the table below it.

Browse it however you think

By week

Everything, week by week.

Tiles

The whole library as a wall you can scan.

Index

The alphabetical list.

A rhythm that works

STEP 1

Open the week page early and read the overview.

STEP 2

Do the readings with one guiding question in hand.

STEP 3

Step through the walkthrough.

STEP 4

Do the activity.

STEP 5

Tick the You can now checklist honestly.

Before each assessment, use **Compare** on the readings you plan to write about, and run **Self-check** for those weeks.

PRACTICAL NOTES

Good to know

- Works on phones, tablets, and laptops, and is designed for keyboard navigation.
- Clearing browser data clears them, and they do not follow you between devices.
- Your saved shelf, notes, and check answers live only in your own browser, on your own device.
- If the site looks stale after an announced update, refresh the page once.

THE ONE RULE THAT MATTERS

When in doubt, Blackboard wins.

SOC122 companion website. Blackboard remains the official course platform for submissions, grades, announcements, discussions, and course records.

QUICK REFERENCE

Where to go for what

Start this week's work	Home ▶ click the week ▶ work top to bottom
Find a reading fast	Library of Readings ▶ search or week strip
See how readings connect	Compare Reading Concepts ▶ pick up to three
Test yourself on a reading	Build Your Reading Comprehension ▶ pick a lens
Look up a term	Glossary & Thinkers ▶ search
Drill before an assessment	Self-check ▶ pick the weeks
Rewatch the week's deck	Weekly Walkthroughs ▶ pick the week
Submit anything / check grades	Blackboard, always

Reading Lens and other study supports

The **Reading Lens** button at the top of every page opens reading supports that apply across the whole site: text size from 75 to 175 percent, comfortable spacing, a high-legibility font, nine page tints (including a blue light filter that warms the whole screen), a reading ruler that follows your pointer (choose its width, pin it in place, and drag it by hand), a large-print magnifier docked at the bottom of the screen, and read-aloud in your choice of the voices on your own device; a Listen button also sits at the top of every page. Your choices save only in your browser, stay on until you change them, and a Reset all supports button returns everything to default.

Your saved work. Notes and check answers save automatically in this browser on this device and are never submitted. They will be here when you come back in the same browser. To keep a permanent copy anywhere, use **Generate Your Weekly Notes** at the end of any week. On a shared or lab computer, the How This Site Works page has a one-click **Clear my saved work** control.

Week pages start folded. Each week opens as a clean map of headings. Press the button beside any heading to open just that section, up to two sections stay open at once (opening a third folds the earliest), and you can fold any section back down when you finish it. Sections fold again when you leave the week, so every visit starts from the clean map, and jumping to a section from the side list opens it for you.

Your study compass. The home page opens with a small panel that reads only what you have already done on this device (weeks opened, checks tried, reflections written) and offers up to three next steps. It uses a few fixed rules, not AI, and nothing about you leaves your browser. You can add your first name so the site greets you; the name stays in this browser only, is never sent anywhere, and Clear my saved work removes it along with everything else.

Reading Rescue. Inside each week's Readings section, Reading Rescue is the shortest honest path back in if you fall behind: one anchor reading, one concept to carry, and one evidence question. It is a way back into the readings, never a replacement for them.

If something breaks. Weekly Walkthroughs now open inside the site with the menu still beside you, and every image and 3D model can be enlarged. If a video will not load or anything looks wrong, the How This Site Works page has a Report a problem button that emails the instructor with the page details filled in. If the site is ever unavailable, everything required for the course is also on Blackboard.

Privacy. Nothing on this site contacts an external service until you choose to load or play a video; when you do, YouTube's privacy-enhanced player applies its own practices inside its frame.
